PROFESSIONAL SUMMARY

Junior Software Developer with experience in ASP.NET MVC web application development, SQL databases, and data analysis. Worked as a Developer & Data Analyst Intern at the City of Johannesburg and as a Web Development Intern at Nemisa. Skilled in building data-driven web applications, implementing database solutions, and developing responsive user interfaces using C#, SQL Server, JavaScript, Bootstrap, and ASP.NET MVC.

TECHNICAL SKILLS

Programming Languages	C#, Java, JavaScript, Python, SQL
Frameworks & Technologies	ASP.NET MVC, Pandas, Bootstrap, HTML, CSS
Databases	MS SQL Server, MySQL, Microsoft Access
Tools & Platforms	Git, GitHub, SQL Developer, CSV Data Processing

EXPERIENCE

City of Johannesburg | Developer & Data Analyst Intern (Jan 2024 – Jun 2025)

- Assisted in developing and maintaining ASP.NET MVC web applications.
- Worked with SQL databases for data querying, reporting, and analysis.
- Participated in IT project development and data analysis initiatives.
- Supported backend functionality and database-driven processes.
- Collaborated with team members to improve application performance and usability.

Nemisa | Web Development Intern (May 2022 – Dec 2023)

- Created functional flow diagrams to improve project planning and development processes.
- Improved website navigation and user experience through interface enhancements.
- Assisted with front-end web design and implementation.

PROJECTS

LoanApp

- Developed a web application that evaluates user credit information and suggests loan options.
- Implemented loan eligibility logic and dynamic loan recommendation functionality.
- Built using ASP.NET MVC, C#, SQL Server, HTML, CSS, and Bootstrap.

Sales Application

- Developed an ASP.NET MVC application for importing and processing transaction records.
- Implemented data summarization and reporting features for business analysis.
- Generated monthly report tables in the database whose data could be viewed via the application

Search And Read

- Built a document search application for locating and reading stored files.
- Implemented folder search functionality and document retrieval processes.
- Developed using ASP.NET MVC and SQL database integration.

Account Finder

- Created an ASP.NET MVC application for searching customer accounts using database queries.
- Enabled accurate account retrieval through primary key matching and filtering.

Comparing Names

- Developed a name comparison utility using string similarity algorithms.
- Implemented percentage-based similarity matching between two names.
- Used C# algorithms to improve comparison accuracy.

EDUCATION

B.Tech in Information Technology: Software

Central University of Technology | 2019 – 2020

National Diploma in Information Technology: Software

Central University of Technology | 2016 – 2018

LANGUAGES

English (Native), isiXhosa (Native), Afrikaans (Advanced)
